Global Company

Low-Code Future, Today!

"By 2025, 70% of new applications developed by enterprises will use Low-Code or No-Code technologies, up from less than 25% in 2020."
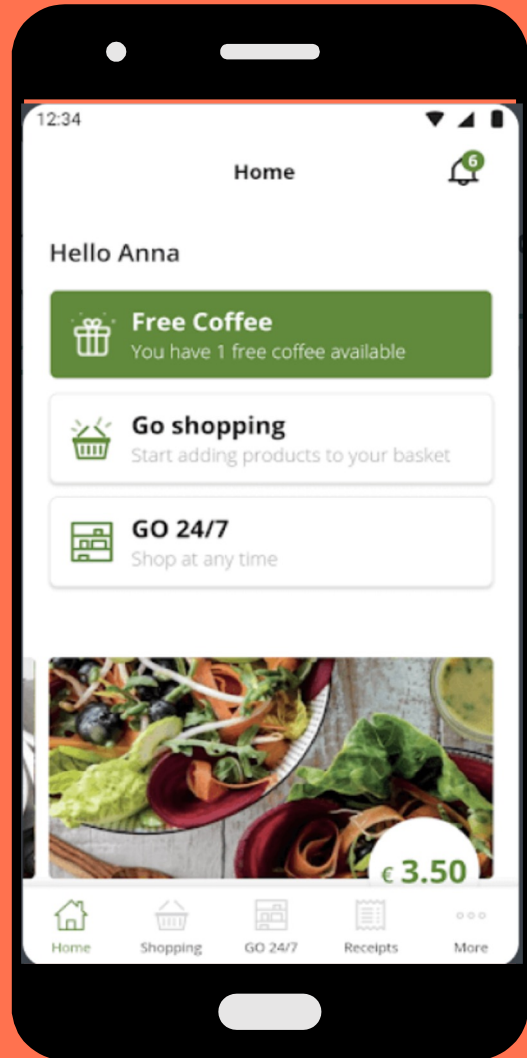

(Gartner - Magic Quadrant for Enterprise Low-Code Application Platforms)

Why Low-Code

- Great Time-to-market ;

- Applications are build-to-change;

- Integration of the shelf;

- Reduces technical debt;

- Enables enterprise-grade app's;

- Enables Citizen developers.

Low-Code Use Case for critical Business Applications in different Industries

Store of the Future "Just Walk Out"

[CMCO Presentation](#)

The world's seventh-largest discount grocery group, needed to explore how new technologies might transform the shopping experience for tomorrow's consumers.
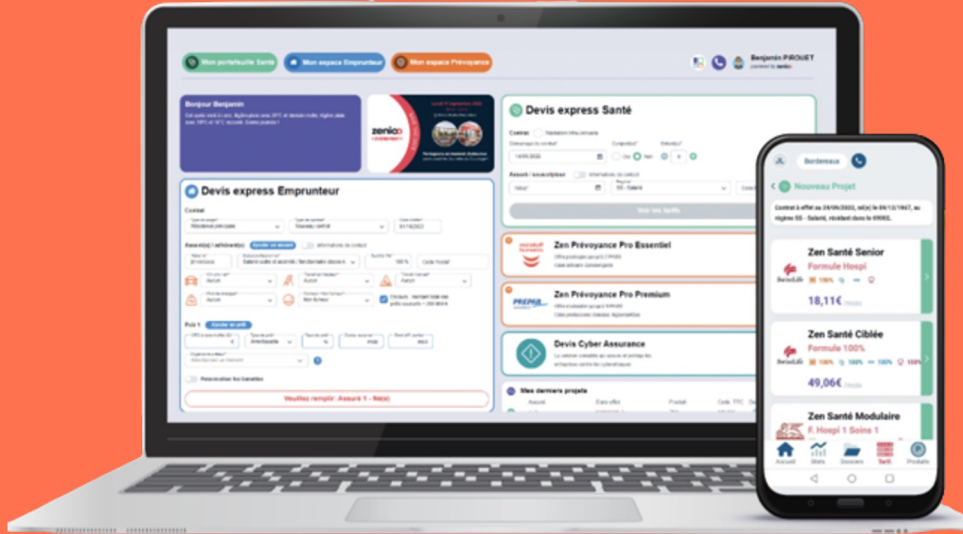

Challenge:
JM wanted to create a store-of-the-future laboratory at Nova School of Business & Economics in Portugal. Called 'Pingo Doce & Go,' The project was Generation Z customer-focused from the start and had the following vision:
To provide a convenient purchase in less than 1-minute and support 24x7 operation.

Solution:
Front & Back Office plus Mobile App in OutSystems full integrated with all core systems like SAP, plus new technology computer vision, NFC, AI, IoT devices, in a full Serf Service buying mode, with automatic check in and Out

Omnichannel Agent Portal & App

ZURICH

360º view of customer activity

16 Weeks to Go Live

Web & Mobile App's

Zurich Insurance Omnichannel Agent Experience, Increasing New Policy Sales.

Challenge:
Zurich Portugal had an old legacy system based on AS/400 that needed to be replaced because it was not meeting their current needs, and they were losing market share.

Solution:
Using OutSystems, Zurich created a digital platform comprising an online portal and iOS and Android apps for tablets and smartphones. This platform replaced a system that agents had found difficult to use. Agents now benefit from increased productivity due to the streamlined functions, improved designs, the new app, and mobile notifications, while Zurich maintains the Core Systems in AS/400..

6 Weeks To Go live

Web Application

The company extended its OutSystems powered customer portal with a new suite of services.

Challenge:
Mercedes-Benz Financial Services Portugal, needed to replace an old and monolithic Contract Management System solution.

Solution:
Mercedes-Benz's customers demand the best. So, when things don't go according to plan, it's crucial to resolve issues quickly and without hassle. The pandemic crisis added more workload to Mercedes-Benz Financial Services Portugal's operations team, it needed to raise its game. The answer was a "no-brainer." The company extended its OutSystems-powered customer portal with an integrated complaints management system, delivered in six weeks.

5 Months

Web Application

Chevron's Canadian business unit, needed a Product Lifecycle Management App.

Challenge:
Chevron needed an improved way to view performance data for the development of drilling wells in its Canadian business unit.

Solution:
This application provides operational views across the lifecycle of drilling pads in Chevron's Canadian BU. The application has a high-level kanban board view showing each pad by stage, an integration with ESRI for project mapping, a detailed view that shows financial and operational data from several internal applications & an automated task and notification system.

Takeda Outsourcing Management Interface (ToMi)

Takeda

Pharmaceuticals Modernizes Critical Research Core System in Four Months

Challenge:
The company's research scientists relied on a legacy system to request chemical compounds from outsourced manufacturers. But the system's underlying technology had reached end-of-life.

Solution:
Takeda used OutSystems to rebuild its outsourced compound synthesis solution. The new application was built in just four months and has improved collaboration, efficiency, transparency, and compliance.
